

Assessment of Specified System form for:

“state building name, Project name or address – site specific identifier”

| | |
|--------------------------------------|--|
| Specified System | (State specified system number) <i>As identified on the specified systems list, e.g. “4 Emergency Lighting Systems”</i> |
| Description | <i>“Self contained emergency lights designed to activate upon mains failure”</i> |
| Model, Type, location | <i>“Model FNLS 4, type 7 at locations specified on drg no. 1234 specified systems layout”</i> |
| Applicable Standard | <i>“Compliant to AS/NZS 2293:1995 – this standard also references illuminated exit signs.”</i> |
| References: Building Code | <i>“Clause F6 Visibility in escape routes”</i> |
| Inspections | <i>“Inspections as specified in standard AN/NZS 2293:1995.”</i> |
| Frequency of Inspections | <i>“Standard AS/NZS 2293:1995 specifies 6 and 12 monthly test procedures to cover luminance levels, duration of operation, battery condition and physical condition of components and housings”</i> |
| Maintenance | <i>“Planned and preventative and responsive maintenance should be carried out in accordance with the standard AS/NZS2993:1995 to ensure effective operation. In particular, luminary housings should be inspected for dust and debris build up, tubular shaped lamps checked at each ends, checking for operation and luminance – replacing items as necessary.”</i> |
| Reporting Procedures | <i>“Test log book – or electronic test log – is required to be maintained. A “12 A” Certificate of Compliance to be issued annually by the tester to the owner.”</i> |
| Person Responsible | <i>“Work to be undertaken by a suitably qualified IQP/LBP with requisite qualifications and experience for the work on which they are engaged”</i> |

To be supplied with application. It may not be possible to state what the “reporting procedures” and who the “responsible people” are at time of application, BUT NOTE all these details will need to be identified by the owner/applicant/or owner’s agent(s) in order for the Compliance Statement and Code compliance Certificate to be issued. A floor plan of the building will be required for use with this/these forms and should be included with the application, and if required, updated before issue of the final certificates.
