

# Kaupapa Māori Adaptation Plan Template

A pre-formatted document and template to support the drafting of the full adaptation plan. This template helps to compile all foundational material generated through Te Ahunga and Te Aponga.

The template includes sections for values and purpose, climate risks and vulnerabilities, adaptation responses (short and long term), implementation planning, timeframes, forecasted resource needs, and visual aids such as maps or appendices. It ensures consistency, clarity, and alignment with tangata whenua aspirations and mātauranga.

<b>Cultural asset, taonga or whanau adaptation plans</b>		
<b>Taonga Identification #</b>	Eg. Flooding at marae	[photo]
<b>Rohe/Iwi</b>		
<b>Pou o te Taiao / Environmental risks to asset</b>		
<b>Atua domains</b>		
<b>Area</b>		
<b>Location</b>		
<b>GPS Coordinates</b>		
<b>Regulatory framework.</b>		
<b>Korero Tuku Iho and Purakau:</b>	Korero tuku iho about the marae and area	
<b>Customary Resources &amp; Tohu (Cultural Indicator)</b>		
<b>Zone:</b>	[insert relevant zones from District Plan if applicable]	
<b>Current Land-Use</b>	<i>[i.e. select from any of: - urban, rural residential, industrial, infrastructure, pasture/agriculture, forestry, horticulture, coastal, open space, conservation/natural habitat, cemetery, other]</i>	

Te Ahunga Nui – Short Term Priorities	e.g flooding from rivers	
Te Ahunga Roa – Long Term Priorities		
Adaptive response: e.g what adaptation methods are needed around the asset?	Development, discharge to rivers, loss of biodiversity and taonga species.	
Current Management or governance structure:	[Identify relevant group(s) who have responsibility/role over asset.]	
Mātauranga Māori to assist with adaptation pathway.		
Current Asset Condition (Monitoring)	[i.e. tangible attributes present or not, values compromised by current activities, degraded, development on whenua etc.	
Site adaptation and options for response	<p>1. i.e. Recognise site through naming and site interpretation</p> <p>2. i.e. Avoid physical destruction</p> <p>3. i.e. Avoid food and toileting activities</p> <p>4. i.e. Avoid discharges to stream</p> <p>5. i.e. Enhance ara connection between maunga and awa</p> <p>6. i.e. Manual weed control</p> <p>7. i.e. Iwi ownership</p>	
Haukainga contacts.		
Mandated hapu rep:		
Project budget and resourcing	How much will this adaptation plan cost? For example forecasting adaptation options such as sandbags, emergency kits, community evacuation plan etc.
