

## APPENDIX 1A: SCHEDULE OF OUTSTANDING NATURAL FEATURES

(Reference: **Part 3 District Wide Provisions, Section 12.1 Landscapes and Natural Features and Resource Maps**)

The Council is required under the Act to protect outstanding natural features and landscapes from inappropriate subdivision, use and development. There are a wide variety of human activities that may threaten the natural character, or continued existence, of important natural features within the District. In order to retain the scientific, educational and amenity values of sites of outstanding natural and geological significance, the Council has identified such sites in this Schedule and on the **Resource Maps**.

The major source of information has been the *“Inventory (and maps) of Important Geological Sites and Landforms in the Northland Region”*, Geological Society of New Zealand unpublished report 95/2, edited by J Kenny and B Hayward (1995). This Inventory lists the best examples of the wide diversity of physical features and processes that together characterise New Zealand’s long and complex geological history, the formation of its landforms and evolution of its unique biota. It was compiled using the combined knowledge and advice of a large sector of the geological, geomorphological, speleological and soil science community of New Zealand.

The Schedule below gives each site’s name, a brief description, the site’s significance and rating, a grid reference and map number. The rating signifies the site’s importance and vulnerability. Sites are listed in the Schedule under three levels (A-C) of significance:

### A International

Site of international scientific importance

### B National

Site of national scientific, educational or aesthetic importance

### C Regional

Site of regional scientific, educational or aesthetic importance.

Each site has been given a vulnerability classification (1 - 4) depending on its perceived vulnerability to human activities:

- 1 highly vulnerable to complete destruction or major modification by humans;
- 2 moderately vulnerable to modification by humans;
- 3 unlikely to be damaged by humans;
- 4 could be improved by human activity.

Eighty (80) natural landforms have been identified in the Far North District and are listed in this Schedule for their scientific, educational or scenic values. Three (3) sites have been assessed to be of international importance: Motukokako (Piercy) Island scarn with babingtonite and ilvaite; Camp Bay mylonite; and Marble Bay Permian fusulines and corals. A further twenty nine (29) sites have been assessed to be of national importance.

Three (3) sites have been assessed as highly vulnerable to human damage or destruction: Hokianga sand dunes, Te Paki sand dunes and Runaruna mud volcano.

In addition, nineteen (19) sites are considered to be very fragile and should therefore receive maximum protection. These have been marked with a (^) in the Table below.

A number of sites listed are too small to show the exact extent of them on the **Resource Maps**. These sites, marked with a (\*) on the Table below, have been shown as a single “point” feature on the Maps rather than as a defined area.

For more detailed information on the outstanding natural features listed in the Schedule, readers are directed to the Inventory published by the Geological Society of New Zealand (referred to above). This Inventory does not form part of the Plan.

Site	Site Name	Site Description/Significance	Rating	Grid Ref.	Map
3	Aurere Beach-Otengi Bay igneous section	Sequence of pillow basalts intruded by irregular bodies of gabbro to dolerite sills - well exposed section	C3	O04511908	14
4	Aurere Beach sediments and nappes, Taipa	One of the best exposed sequences showing relationships within the Northland Allochthon	B3	O04506907	15
5 *	Camp Bay mylonite and schistose Tangihuas	Coastal section of schistose sheeted dike complex and other igneous rocks - well exposed area of schistose Tangihuas (<100m across)	A3	P04753916	16
6	Cave Stream sediments, Waihou Valley	Occurs within a large allochthonous block - thick well exposed sequence of mid Tertiary facies.	C3	P05792567	34
8*^	Haruru Falls basalt lava flow	Lava flow following the Waitangi River - excellent window into the inside of a 5km long columnar jointed basalt flow (<100m across)	C3	P05064575	36
9*	Hihi Beach, Manganui Lignite Beds	Non-marine conglomerate, sandstone and lignite beds - best exposure of Manganui Lignite Beds (<100m across)	C3	O05597915	15
10*^	Hokianga Miocene "Orbitolite" bed	Contains largest known foraminifera in New Zealand (2.5cm diameter)	C2	O06445296	44
11	Hokianga sand dunes	Large area of active sand dunes reaching heights of 200m - high scientific, educational and scenic value	B1	O06437323	38 & 44
12*^	Jellicoe Cave	50m long, 1-2m wide, 3.8m high "keyhole" cave - unusual navigable sea cave that passes right through small point	C3	P04800887	16
13*	Kaikohe scoria cone	30m high scoria cone with a 5m deep crater - 2 well preserved, sub-parallel collapse channels can be observed (both <100m across)	C2	P05818431	40
15*	Karau Pt dacite dome	200m diameter intrusional neck of dome - good exposures of small eroded flow-banded dacite dome	C3	P04753938	16
21	Lake Ohia Pleistocene fossil forest	South east fringe of Lake, often partly submerged - well preserved and now partly exhumed buried Quaternary kauri forest (30,000 years old)	C2	O04454916	14
23	Lake Omapere	Lake formed by a lava flow damming valley - scientific, educational and scenic value	B3	P05826504	34
24*	Lodore Road obsidian source	Prehistoric obsidian source - unique dacitic obsidian utilised in prehistoric times (<100m across)	C3	P05884594	28
25*	Mangonui Miocene coconut beds	Best preserved fossil coconuts in New Zealand - of historic and paleoclimatic importance (site is <100m across)	B2	O04581901	15
26^	Marble Bay Permian fusulines, corals, spillite and melange	Complicated melange association - exposed in the coastal rocks from Te Anina Pt, between Tauranga Bay and Marble Bay, south of Whangaroa - of national importance in paleogeographic reconstruction's - one of only three known New Zealand localities	A3	P04836886	16
27	Matai Bay beaches	2km by 1km bay with narrow entrance to the open sea - extremely well defined landform of scientific, educational and scenic value	C2	O03490080	9 & 11

Site	Site Name	Site Description/Significance	Rating	Grid Ref.	Map
29	Maungakawakawa scoria cone (Hariru Pa)	Complex elongate scoria cone 60m high (340m ASL) - very good example of breached scoria cone	C2	P05872494	35
31 <sup>*^</sup>	Motukawanui pillow lava, Cavalli Islands	50m thick sequence of pillow lavas conformably within sequence - possibly best preserved pillow lava in Waipapa basement	C3	P04975884	17
32 <sup>^</sup>	Motukokako (Piercy) Island scarn with babingtonite and ilvaite	Large crystals of babingtonite in Pb/Zn skarn in Tertiary limestone - well exposed example of Pb/Zn skarn - New Zealand's best ilvaite exposure	A2	Q05328697	30
33 <sup>^</sup>	Motukokako (Piercy) Island sea arch	Very good example of a sea arch - well defined landform of scientific, educational and scenic value	C3	Q05329695	30
34	Mt Camel terrane volcanoclastics	Well exposed thin bedded flysch - demonstration of contemporaneity of Mt Camel Volcanics and associated flysch	C3	N03254125	8
35	Ngahuha scoria cone	Small 62m high cone standing above surrounding basalt plateau - associated flow follows the Werowero Valley	C2	P05990465	35, 41 & 42
36 <sup>*</sup>	Ngawha Springs hydrothermal field	Number of hot and cold springs, sinter deposits, fumaroles, stagnant acidic pools, mercury deposits, cinnabar (individual springs are <100m across)	B2	P05887434	41
37	North Cape ultramafic/ gabbro complex	Only ultramafic/gabbro ophillite complex in north New Zealand	B3	N02120550	2
39 <sup>*</sup>	Opononi limestone, Hokianga	Thick argillaceous limestone - best exposure in the Hokianga area of a small sequence through deep water Oligocene limestone with redeposited sandstone beds (<100m across)	C3	O06463330	44
40 <sup>*^</sup>	Otataroa Caves	Small stream cave about 100m long - contains fossil bone deposits, moa bones, site of discovery of extinct giant skink	C3	O04627700	26
42	Parengarenga (north shore) Miocene fauna	Semi-continuous, early Miocene sequence rich in macro and microfossils - most complete early Miocene sequence in the north half of North Island	B3	N02065444	2 & 4
43	Parengarenga-Paratoetoe Miocene sequence	Dipping fossiliferous siltstones and fine sandstones of shelf origin - best exposed sequence through most of the upper Parengarenga Group	B3	N02053441	2 & 4
44	Parengarenga silica sand/ Kokota (The Sandspit)	Sand very high in silica - largest unvegetated spit in New Zealand, most extensive and highest grade silica sand deposit in New Zealand	B3	N02090400	4
45	Perforated Point overturned fold	A good example of the deformation within the Mt Camel terrane	C3	N03261125	8
47	Pouerua (Pakaraka Mountain) scoria cone and lava fields	Scoria cone, 750m in diameter, 135m high (275m ASL) with associated flows - distinctive volcanic centre with well preserved crater and volcanic form, surrounded by the best preserved lava flow field in Northland	B2	P05953471	35 & 41
49	Puketutu (Puketona) volcanic cones	A group of cones and mounds overlying a more massive flow - now largely quarried	C2	P05995553	35

Site	Site Name	Site Description/Significance	Rating	Grid Ref.	Map
51	Putahi rhyolite dome with associated halloysite	Craterless dome rising 90m above underlying basalt plateau (381m ASL) - easily accessible rhyolite dome in contact with a Quaternary basalt flow - one of only two crystalline peralkaline rhyolite domes of Quaternary age in Northland	B4	P05843472	34
52 <sup>*^</sup>	Rainbow Falls	Waterfall held up by an eroding overhanging lava flow - extremely well defined landform of scientific, educational and scenic value (face is <100m across)	C3	P05966648	28
53	Rangiahua autochthonous sediments	Most complete and best exposed autochthonous middle Tertiary sequence beneath the allochthon in Northland	B3	O05685562	33 & 34
54	Rawene Paleocene limestones	Highly disrupted blocks within allochthon - best exposures of deep water Paleocene limestone facies in Northland	C3	O05563449	39
55 <sup>^</sup>	Runaruna mud volcano	3m high mud volcano mound - only active mud volcano in Northland	B1	O05421546	32
57 <sup>*</sup>	St Pauls dome-shaped hill	Prominent dome shaped rocky hilltop visible from many parts of the Whangaroa area - classified as an extremely well defined landform of scenic value (<100m across)	C3	P04792831	16 & 21
59	Tarahi scoria cone	A breached scoria cone thought to be the highest centre in the Kaikohe area - 85m above the surrounding flows, 390m ASL	C2	P05882484	35
60 <sup>*</sup>	Taratara butte	Spectacular flat topped, steep sided hill, the flat top controlled by very gently dipping strata - unusual feature, classified as an extremely well defined landform of scenic value (<200m across)	C3	P04717803	21
61	Tauanui (Taheke III) scoria cone	A well preserved cone in Kaikohe area with a distinct volcanic landform – 150m high, 355m ASL	B2	P06886338	41 & 46
62 <sup>*</sup>	Taupo Bay flow	Best exposed andesite flow within Wairakau Volcanics at Whangaroa (<100m across)	C3	P04773892	16
63	Taupo Bay ring plain deposits	Best example of easily accessible exposures of laharic ring plain breccias	C3	P04765891	16
64 <sup>*</sup>	Tauranga Bay channelised flow	200m wide andesite flow - best exposed easily accessible example of a flow confined within a Miocene ring plain paleogully	C3	P04823878	16
65 <sup>*^</sup>	Tauranga Bay coastal features	Very good examples of shore platforms and sea caves - extremely well defined landforms of scientific and educational value (individual sites <100m across)	C3	P04828883	16
66 <sup>*</sup>	Tauranganui Stream mouth melange	An excellent example of a structural melange between nappes within the Northland Allochthon (<100m across)	B3	O04591939	15
67	Te Ahuahu volcanic cone	Well preserved single circular cone, 500m in diameter, standing 100m above the surrounding plateau - 380m ASL - basaltic bombs can be found in a small quarry at the site	C2	P05872508	35
68	Te Huka Beach and Kuruhaupo Rocks Lower Miocene sediments	Deep water fine-grained sediments - best exposed sequence through most of lower Parengarenga Group	C3	N02057435	2

Appendix 1A – SCHEDULE OF OUTSTANDING NATURAL FEATURES

Site	Site Name	Site Description/Significance	Rating	Grid Ref.	Map
69	Te Paki sand dunes	Best preserved area of active dunes on Aupouri Peninsula - extremely well defined landform of scientific, educational and scenic value	B1	M02890410	3
71	Te Pua crater and flows	2.5km diameter, sub-circular centre with a large central crater - 750m diameter and 30-40m deep - not an "andesite" as first thought - stratigraphic position and relationship still under dispute	C3	P05860480	34
72	Te Puke scoria cones	Three well preserved scoria cones and craters - main cone 140m ASL	C2	P05047604	29
73*	Te Reinga Bay thrust contact	One of the best examples of contacts between nappes within the Northland Allochthon (<100m across)	B3	O04600959	12
76^	Twilight Beach pillow lavas	Best preserved example of Cretaceous pillow lavas in Northland	C3	M02835437	3
77*^	Waikari Island (Old Hat)	Small island surrounded by broad intertidal rock platforms, giving it the classic "old hat" shape - extremely well defined landform of scientific, educational and scenic value (<200m across)	B3	Q05136534	36
78*^	Waikuku Beach (north) Miocene limestone	Only marine middle or late Miocene fauna known north of East Cape or Kawhia - contains interesting warm water molluscs and larger foraminifera (<100m across)	B2	N02119528	2
79*^	Waikuku Beach (south) Miocene limestone	Only marine middle or late Miocene fauna known north of East Cape or Kawhia - contains interesting warm water molluscs and larger foraminifera (<100m across)	B2	N02114514	2
80	Waikuku Flat dune dammed swamp		C2	N02100526	2
82*	Waimamaku, Pinehill Stream Miocene molluscs	diverse, early Miocene molluscs (<100m across)	B3	O06507286	44
83*	Waimamaku, Taita Stream Miocene molluscs	Diverse, early Miocene molluscs (<100m across)	B3	O06548287	44 & 45
84*	Waimamaku, Waimamaku River Miocene molluscs	Very diverse, early Miocene molluscs (<100m across)	B3	O06552270	45
85	Waimimiti scoria mounds	Segmented scoria ring - one of two localities where abundant large, 1-10cm, gabbrioc intrusions can be found	C2	P05875473	35
86*^	Waipapa River outlier of Waitemata sediments, Puketi	20m sequence - only known exposure of early Miocene marine sedimentary rocks between Omapere and Parengarenga - possibly records the first phase of allochthon movement into the basin	B3	P05728576	34
88	Wairakau estuary	Best example of a flooded deeply incised valley in Northland - now partly infilled by modern sediments forming a tidal estuary with steep rocky walls - extremely well defined landform of scientific, education and scenic value			16
89*	Waitangi flow gabbroic inclusions	Columnar jointed basalt flow extending into the sea - best locality for gabbroic inclusions of Quaternary age in Northland (<100m across)	B3	P05094591	29

Site	Site Name	Site Description/Significance	Rating	Grid Ref.	Map
90*^	Waitapu Bay Cretaceous unconformity, Whangaroa	Within large nappe in Northland Allochthon - best exposure of several around Whangaroa (<100m across)	C3	P04799837	16
91	Waiwhatawhata Coast sediments and basalt flows, Hokianga	Excellent exposures of marine deltaic conglomerate and terrestrial volcanoclastic sequence - best Miocene sequence in Hokianga region - well exposed section through Waipoua Basalt	B3	O06446266	44
92*^	Wekaweka natural gas seep	Best, perhaps only, true hydrocarbon seep in Northland - a 1-2m diameter mud pool with moderate to vigorous discharge of methane	C3	O06587263	45
93	Whakateterekia allochthon block	Well exposed thinly bedded argillaceous limestone - basal block of allochthon, overturned, overlying a melange zone	C3	O04690706	21 & 27
94	Whakateterekia Stream Eocene sediments	Type section of Mangapa Mudstone, and possibly the thickest in situ Eocene in Northland	B3	P05714695	21 & 27
95*	Whangape pillow basalt	Well preserved pillow lavas - among the best exposed and preserved examples of pillow lavas in the Tangihua Volcanic Group of Northland (<100m across)	C3	O05322497	31
96	Whangaroa exfoliation domes	Spectacular area of rocky exfoliation domes and ridges that surrounds Pekapeka Bay - classified as extremely well defined landforms of scenic value	C3	P04780872	16
97*^	Whangaroa Harbour lacustrine sequence	Best exposure of lacustrine sediments in Wairakau Volcanics sequence - excellent soft sediment deformation structures - one of the best exposures of penecontemporaneous slump folding in lake sediments in New Zealand (<100m across)	C3	P04786854	16
98	Whangaroa North Head ring plain deposits	Best exposures of Miocene ring plain deposits in northern New Zealand, including several paleogullies and their walls	B3	P04800887	16
99	Whangatupere Bay plutons	Exposures of predominantly quartz microdiorite with coarse lithologies present - best section of both older and younger Karikari Plutonics	C3	O03519068	9, 11 & 12
100	Whatuwhiwhi Cretaceous sediments	Best and most complete Cretaceous sedimentary sequence in Northland and possibly the only autochthonous Cretaceous outcropping	C3	O03487022	11
101	Maungaturoto volcanic cone	Small, well preserved volcanic cone, 100m high, 285m ASL - typical of the younger centres in Northland	C2	P05909475	35
102	Parengarenga-Te Pokere Miocene fauna	Diverse, warm-water molluscan fauna	B3	N02045453	2

## APPENDIX 1B: SCHEDULE OF OUTSTANDING LANDSCAPE FEATURES

(Reference: **Part 3 District Wide Provisions, Section 12.1 Landscape and Natural Features** and **Resource Maps**)

The Council is required under the Act to protect outstanding natural features and landscapes from inappropriate subdivision, use and development.

In preparing this Plan, the Council commissioned a Landscape Assessment of the District. This assessment identified landscape units of outstanding and significant values, as well as specific outstanding landscape features. This Schedule lists these Outstanding Landscape Features.

For more detailed information on landscape units and features, readers are directed to the separate document entitled "*Landscape Assessment*" LA4, (1995). This document does not form part of the Plan and is available from the Council.

Feature Name	Description	Map #
Cape Maria van Diemen	Coastal headland	1
Cape Reinga	Coastal headland	1
The Pinnacle	Prominent feature inland from Spirits Bay	2
Kokota Spit	Expansive exposed sand area	4
North Cape	Coastal headland, including Morimotu Island	2
Mount Camel	Scrub-clad hill situated on the outer peninsula at Houhora	8
Perpendicular Point	Point at southern end of coastal peninsula at Houhora	8
Lake Rotokawau	Inland lake at Puheke Beach, Karikari Peninsula	11
Puheke	Prominent feature overlooking Puheke Beach, Karikari Peninsula	11
Rangikapiti Pa	Conical hill pa site overlooking mouth of Mangonui Harbour	15
Pekapeka Rocks (Dukes Nose)	Prominent series of rock formations on northern headland of Whangaroa Harbour	16
Ahipara (Whangatauateia Pa)	Escarpment cone area overlooking Ahipara	24
Taratara	Prominent landmark overlooking Waihopo Bay, Whangaroa	21
Ohakiri (St Pauls)	Prominent landmark overlooking Whangaroa	16 & 21
Orotere	Prominent landmark adjoining SH10, south east of Kaeo	22
Taronui Lagoon	Lagoon & headland adjoining rocky coast at Tapuaetahi	22
Cape Wiwiki	Rugged cape at northern extreme of Bay of Islands, including the Ninepin and Harakeke Island	23 & 29
Whangape Harbour Mouth	Dramatic harbour entrance through coastal hills	31 & 38
Te Ahuahu	Prominent volcanic cone and pa site adjoining SH1 at Te Ahuahu	35
Hariru Pa	Volcanic cone and pa site overlooking Remuera Settlement area (Maungakawakawa)	35
Waitangi Wetland	Extensive wetland area within the Waitangi Forest	28 & 29
Cape Brett	Southern cape of Bay of Islands - prominent headland	30
Piercy Island	Prominent island off Cape Brett (Hole in the Rock)	30
Te Pouahi	Towering sand dunes on Hokianga Harbour's North Head	38 & 44
Kaipaha Swamp	Expansive swamp area situated on flat land south west of Kaikohe	40 & 46
Maungatoroto	Volcanic cone visible from SH12 between Kaikohe and Ohaeawai	35
Tarahi	Volcanic cone overlooking Remuera Settlement area	35
Pouerua	Prominent pa/archaeological site on volcanic cone at Pakaraka	35
Tauanui	Volcanic cone south east of Tautoro	41 & 46
Taikirau Wetland	Substantial wetland area near Motatau	42
Pukekohe No.3	Peak on south head of Hokianga Harbour, overlooking Signal Station Rd and harbour	44

## APPENDIX 1C: SCHEDULE OF LAKES

(Reference: *Part 3 District Wide Provisions, Section 12.7 Lakes, Rivers, Wetlands and the Coastline*)

The Council has a responsibility under the Act for subdivision, use and development of land, and for the control of activities on the surface of water. Council has in **Chapter 12.7** identified various waterbodies from which buildings and impermeable surfaces must be set back in order to ensure that subdivision, use and development of land does not adversely impact upon these waterbodies.

This schedule of lakes has been sourced from information held by Northland Regional Council and the Department of Conservation. It is intended to provide information to applicants as to the location of lakes within the District to which setbacks apply. It also indicates the name and type of waterbody where known.

NAME	WATERBODY TYPE	INFLOWS/OUTFLOWS	LOCATION	
			E	N
	Lake		2573600.0	6678400.0
	Lake	Opepe Stream	2592500.0	6686900.0
	Lake	Waitohara Stream	2610400.0	6670500.0
	Lake	Opete Creek Tributary	2609800.0	6672400.0
	Lake	Waikare Inlet	2614700.0	6655100.0
	Lake	Kapiro Stream	2594200.0	6669000.0
	Lake	Wairoa Stream Tributary	2597900.0	6658500.0
	Lake	Waihopo Stream Tributary	2517300.0	6714500.0
	Lake	Te-Puna Inlet	2604100.0	6672600.0
	Lake	Tuataranui Stream Tributary	2552600.0	6676500.0
	Lake		2541100.0	6690400.0
	Lake	Ohiritoa Stream Tributary	2543000.0	6677000.0

## APPENDIX 1D: SCHEDULE OF NOTABLE TREES

(Reference: **Part 3 District Wide Provisions, Section 12.5 Heritage and Zone Maps**)

The Council has a responsibility under the Act to identify and protect the heritage resources of the District. Accordingly, the Council has compiled a Schedule of Notable Trees.

Trees listed in this Schedule (and shown on the **Zone Maps**) have been evaluated using the New Zealand Institute of Horticulture Tree Evaluation Method. This method enables an objective assessment of the particular values of the tree at its location. Factors considered include:

- size of the tree;
- the importance of its position;
- the presence of other trees;
- the rarity of the species;
- the setting and the tree's importance to that setting;
- life expectancy and health of the tree;
- form or shapeliness of the tree;
- any other special features associated with the tree that may increase its value as a notable tree.

Only those trees that scored over 1,000 points have been included in the Schedule. Just under a third of the trees are native to New Zealand, the remainder being introduced. Just over half the trees in the Schedule occur in urban areas, the rest occurring in rural settings.

## APPENDIX 1E: SCHEDULE OF HISTORIC SITES, BUILDINGS AND OBJECTS

(Reference: **Part 3 District Wide Provisions, Section 12.5 Heritage and Zone Maps**)

The Council has a responsibility under the Act to identify and protect the heritage resources of the District. Accordingly the Council has compiled a list of sites, buildings, and objects in the District that have historic significance. These are contained in the following Schedule.

The main source of information for historic sites, buildings and objects listed in the Schedule has been the New Zealand Heritage List for the Far North District. In addition some sites have been “rolled over” from the transitional district plan and still others have been nominated by public submission. In addition sites 231 - 234 inclusive have been sourced from the “*Inventory of Important Geological Sites and Landforms in Northland*”. They have been included in this Schedule because they are “man-made” geological features rather than “natural”, and are of outstanding historic significance.

Site	Site Location	Site Name	HPT Cat	Legal Description	Map

The sites listed below are located within the Coastal Marine Area and are beyond the jurisdiction of the Far North District Council's District Plan. These sites are registered by the Heritage New Zealand Pouhere Taonga under the Heritage New Zealand Pouhere Taonga Act 2014 as places of heritage significance. They may also be archaeological sites as defined in the Act. Anyone contemplating any alterations to these items should first contact the Heritage New Zealand Pouhere Taonga.

## APPENDIX 1F: SCHEDULE OF SITES OF CULTURAL SIGNIFICANCE TO MAORI

(Reference: **Part 3 District Wide Provisions, Section 12.5 Heritage and Resource Maps**)

The Council has a responsibility under the Act to recognise and provide for the relationship of Maori and their culture and traditions with their ancestral lands, water, sites, waahi tapu, and other taonga. The Council must also have regard to kaitiakitanga (the exercise of guardianship and the ethic of stewardship), and shall take into account the principles of Te Tiriti o Waitangi (Treaty of Waitangi).

The provisions in **Chapter 2** of this Plan provide an overview of the resource management issues of concern to tangata whenua. Provisions in **Section 12.5** deal more specifically with the heritage values of Sites of Cultural Significance to Maori and the need to protect those values. One method of protecting Sites of Cultural Significance is to prepare an inventory of such sites and to restrict activities within such sites. Where there is an application to modify any Site of Cultural Significance to Maori, the tangata whenua shall be considered an affected party.

The following schedule has been sourced in part from information in the Transitional District Plan. In addition, the Council has resourced a series of workshops. The result of these workshops has been the identification of specific sites, the identification of areas which contain unmarked sites, and the people and/or organisations to be contacted in response to any application for a resource consent. The information gathered at these workshops is held by Council and is available on request.

The sites were located on 1:50,000 topographic maps (MS260 series) by circles drawn around individual sites (where the centre point of the circle depicts the location of the site); or large circles/areas drawn around a number of unmarked or “silent” sites. The location of these sites or areas is by map reference, or in the case of information from the Transitional District Plan, by legal description. Revealing the location of the “silent” sites, including waahi tapu, is a sensitive issue.

At this point in time, this Schedule only lists those sites that:

- (a) are on Maori land or on Department of Conservation estate; and/or
- (b) were in the Transitional Plan; and/or
- (c) are on general title land and there has been consultation with the affected landowner.

Where the column headed “Name & Description” contains a reference to “silent file”, the Council has made an order pursuant to s42 of the Resource Management Act 1991 prohibiting or restricting the publication or communication of any information supplied to avoid serious offence to tikanga Maori or to avoid the disclosure of the location of waahi tapu.

## APPENDIX 1G: REGISTERED ARCHAEOLOGICAL SITES

(Reference: *Part 3 District Wide Provisions, Section 12.5 Heritage and Resource Maps*)

The Council has a responsibility under the Act to identify and protect the heritage resources of the District. Accordingly, the Council includes this Schedule of Registered Archaeological Sites in its Plan (Source: New Zealand Heritage List).

In addition, the Council holds the New Zealand Archaeological Associations list of Recorded Archaeological Sites, both electronically and in hard copy.
